👤 PROFESSIONAL SUMMARY

Earth Observations, Geospatial Systems Architect, Agentic AI Developer, Team Lead, and Cloud-Native Systems Engineer with 20 years of experience delivering enterprise-level cloud-native web and data-intensive platforms across the Pacific region. Deep expertise in open-source geospatial systems, AI machine-learning pipelines, earth observation workflows, disaster risk analytics, and resilient data platforms. Strong advocate for open data, open-source technology, and capacity building for sustainable development.

Long-standing technical project delivery experience across Pacific Island countries and across development sectors. Extensive history of government-wide technical workshops and capacity building in GIS, remote sensing, and earth observation systems.

Managed multidisciplinary teams of up to 20 staff and coordinated geographically-dispersed consultants and service providers for IT systems and product delivery. Certified in PRINCE2 project management, with strong experience in financial planning, budgeting, vendor management, and ISP, cloud vendor, telecommunications coordination, and a consistent track record of reporting programme performance, risks, and delivery progress to senior management and governance boards.

Engaged with C-suite executives, government ministers, and international development partners to provide strategic guidance on ICT investments. Designed and delivered over 30 national capacity-building workshops across 10 Pacific Island countries, and is comfortable presenting IT performance, risks, and digitalisation progress to boards and senior leadership.

🏢 EXPERIENCE

Lead Architect | Principal Consultant

Agentic Pacific

2026 - xxxx

- AI Context and Harness Engineering for LLMs and VLMs
- Implementing Automated Agentic Workflows for Finance, Legal, Economic, Environmental, Health and Operations Intelligence
- Specialised AI Model Development (Fine-Tuning) and Deployment eg: Pacific-Language Models
- Earth Intelligence and Large-Scale Geospatial Systems Architectures
- Cyber-Security, Risk Mitigation and Cloud-Architecture Strategies
- Data Analytics, Insights, and Integrated Reporting

Team Leader, Geoinformatics | Earth and Oceans Observation Programme

Pacific Community (SPC), Geoscience Division

2021 - 2026

- Leading technical delivery of regional geospatial and earth observation systems across Pacific Island countries
- Technical lead for Digital Earth Pacific (DEP)
- Driving open data and interoperability approaches for decision-support platforms in disaster risk and climate resilience
- Implemented and deployed National Spatial Data Infrastructure (SDI) across several Pacific Island countries

Senior Geospatial Systems Architect

Pacific Community (SPC), Geoscience Division

2015 - 2020

- Architected and delivered enterprise geospatial and risk-information platforms for regional and national programmes
- Led development of cloud-native and big-data analytical systems for earth observation applications
- Supported key platforms including Pacific Risk Information System and Pacific Ridge to Reef initiatives

ICT Systems Developer

Pacific Islands Applied Geoscience Commission (SOPAC/SPC)

2008 - 2014

- Built and maintained geospatial, web, and database systems for disaster, ocean, and energy work programmes
- Implemented platforms including Pacific Disaster Net and Geonetwork services
- Delivered tools supporting regional data sharing and reporting

- Delivered enterprise software systems and workflow solutions for public and private sector clients
- Developed and integrated web, database, and reporting applications across multiple domains

- Built business software and reporting modules, including legacy system conversion and data migration work

EDUCATION

SELECTED PROJECTS

Digital Earth Pacific	digitalearthpacific.org
Pacific Data Hub Nexus	nexus.pacificdata.org
Pacific Risk Information System	nexus.pacificdata.org
PacSAFE Rapid Impact Assessment	pacsafe-doc.readthedocs.io
Pacific Ridge to Reef State of the Coast	r2r.spc.int
Pacific Ocean Portal	oceanportal.spc.int
Pacific Disaster Net / Regional DRM	pacificdisaster.net
Fijian Language LLM	agenticpacific.com.fj

LEADERSHIP, ADVISORY & COMMUNITY ROLES

- Founding Board Member, **Pacific GIS and Remote Sensing Council** (2010–2022)
- Member, **Planet Labs Asia-Pacific Customer Advisory Board** (2024–2025)
- Industry Steering Committee Member, **School of Computing, Information and Mathematical Sciences**, University of the South Pacific (2012–2013)
- Founding Member, **Oceania Geospatial Symposium (OGS)** (2022 – Present)
- Steering Group Member, **SPC Data Governance Working Group**

RECENT CERTIFICATIONS

- PRINCE2 Project Management
- Machine Learning with Google Earth Engine, EO Solutions (2020)
- Earth Engine Earth Observation Foundations, EO Solutions (2020)
- Pacific Community Leadership Programme, SPC (2017)

SKILLS

Domain Expertise

Earth Observation Analytics

Geospatial Platform Architecture

Agentic AI Systems

Disaster Risk Information Systems

Open Data Advocacy

Technical Team Leadership

Data Analysis and Visualisation
